

## 3D Modeling for Constructability Review and Construction Schedule Development and Simulation

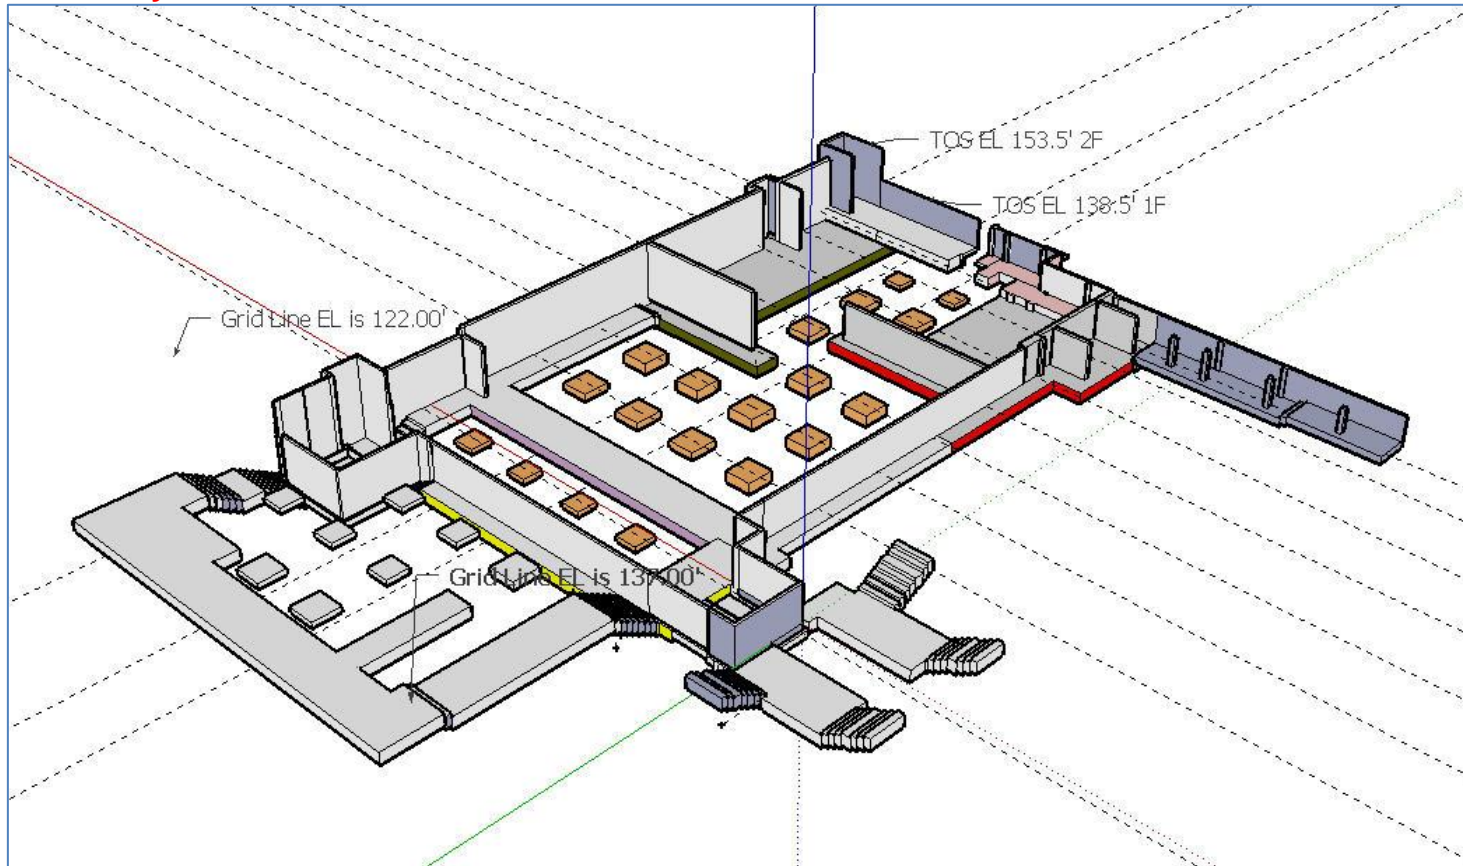

Finally, this is not a dream or eye candy. This is a real world solution for your bottom line – **avoid mistakes, expedite learning curve** and **save money**. Of course, it is great for the **client presentation**, even the **claim presentation**. Furthermore, I am guaranteeing an affordable service. You would not need to buy any software. Software is FREE. Once the models are done by me, you own the models (files) and can expand them as much you like by using the same software I am using (not a Viewer). Please call for an estimate. It is too cheap to list it. Here are some examples of my past work. The below shows a foundation 3D model from different angles.

### Foundation Study

## Wall Study

## Mass/Elevation Study
